Rose Petruzzi is an artist and illustrator. She enjoys teaching art and the creative process to adults and children of all levels and abilities.

Rose feels strongly that every person is innately creative, and it is their birthright to express themselves creatively.

Sometimes, it is a matter of the individual moving into, and recognizing their own personal aesthetic "energy signature".

Many students benefit from the positive tips Rose offers during the artistic process.

Her creative consultation empowers and encourages students to embrace their truest expression and...have fun!
